

SCHOOLTOOL FEATURE UPDATE 19.1

USING THE NON-BINARY GENDER OPTION

On **December 10, 2021**, SchoolTool feature update 19.1 will be installed. Part of this update includes **the addition of the non-binary gender feature** option. This option will allow the user to **select, M, F, or X** for the gender of a student, parent, or faculty member. For non-binary gender selection, pronouns will reflect they/them/their/child. While this feature has been added to SchoolTool, **not all reports, dashboards, and exports within Schooltool have been updated** to reflect the non-binary gender feature option. Please find below a **list of areas in SchoolTool that have not yet been updated** to reflect this new option. **If a student has a gender of X selected, the areas listed below will default the gender to F.** Pronouns will default female as well. An **additional feature update is scheduled to be released in the spring** to update the remaining areas of SchoolTool with the non-binary gender option to reflect an X versus defaulting to an F. **Please keep this in mind if you decide to use this functionality prior to the Spring release.**

AREAS OF SCHOOLTOOL NOT UPDATED WITH FEATURE RELEASE 19.1THESE AREAS WILL DEFAULT AN **X** TO AN **F** (AND ASSOCIATED PRONOUNS)
